Research Interests

The intersections across **Machine Learning / Deep Learning, Electronic Design Automation, Combinatorial Optimization**.

Education

National Taiwan University (NTU)   *Taipei, Taiwan*
B.S. Major in Electrical Engineering, Minor in Computer Science & Information Engineering   *09/2014 - PRESENT*
- **GPA: 4.17/4.3 (top 5%)**, major GPA: 4.23/4.3, last 60: 4.26/4.3
- **Machine Learning**: Intro. to Digital Speech Processing, Machine Learning†, Machine Learning and Having It Deep and Structured†, Advanced Deep Learning†, Mathematical Principles of Machine Learning†, Topics in Machine Learning†
- **Algorithm**: Algorithm Design & Analysis, ACM-ICPC, Graph Theory†, Physical Design for Nanometer ICs†

(† denotes graduate-level courses)

Research Experience

***Research Assistant*, Speech Processing and Machine Learning Lab,** with Prof. Hung-yi Lee   *09/2016 - PRESENT*
Multivariate Time Series (MTS) Forecasting
- Proposed the temporal pattern attention for MTS forecasting which use CNNs to extract temporal patterns across multiple time steps, instead of a single time step as in traditional attention mechanisms.
- Verified by toy examples, our attention is able to attend on multiple time steps and handle interdependencies between series.
- Our attention achieved state-of-the-art performance on a wide range of MTS datasets, including polyphonic music notes.

Natural Language Processing
- Trained a chat-bot with seq2seq model with deep reinforcement learning on the Cornell movie dialog corpus.
- Used the CycleGAN paradigm with LSTM to train unpaired machine translation.

Open-Set Multi-Speaker Speech Separation (Ongoing)
- Proposed to use the phase in complex domain to improve performance.

***Research Assitant*, Electronic Design Automation Lab,** with Prof. Yao-Wen Chang   *02/2016 - PRESENT*
Bivariate Gradient-based Wirelength Model
- Proposed a novel bivariate gradient-based wirelength model for global placement which combines the advantages of bivariate and multivariate functions.
- Our wirelength model outperforms previous bivariate and state-of-the-art multivariate wirelength models.

Bus Routing
- Implemented a DAG-based topology-matching bus routing engine to compete in the 2018 ICCAD CAD contest, and won the top 10.
- After upgrade, our algorithm outperforms the all participants of 2018 ICCAD CAD contest, where the 1st place router result in 145% higher cost than ours.

Initial Detailed Routing
- Implemented a multithreaded initial detailed routing engine that considers global guides to compete in 2018 ISPD contest, and won the 3rd place.
- The multithreaded scheme speeds the engine up almost proportional to the number of threads.
- After upgrade, our algorithm surpassed the winner of 2018 ISPD contest by 23%. [**ICCAD 18**]

***Undergraduate Researcher*, Speech Processing Lab,** with Prof. Lin-shan Lee   *09/2017 - 09/2018*
Reinforcement Learning on Real-Time Online Games
- Applied computer vision technique to guide a rule-based Slither.io agent.
- Trained another Slither.io agent by Asynchronous Advantage Actor Critic (A3C) which surpassed rule-based model.

***Software Engineering Intern*, Synopsys, Inc.**   *07/2016 - 08/2016*
Single Layer Global Routing
- Implemented a single layer global routing algorithm based on mixture of previous literature and own thoughts.
- The algorithm successfully routed many real industrial cases.

Teaching

***Teaching Assistant*, Algorithm Design and Analylsis**, Prof. Yun-Nung Chen & Hsu-Chun Hsiao   *09/2018 - PRESENT*
***Teaching Assistant*, Machine Learning and Having It Deep and Structured**, Prof. Hung-Yi Lee   *02/2018 - 06/2018*
***Teaching Assistant*, Machine Learning**, Prof. Hung-Yi Lee   *09/2017 - 01/2018*

Honors & Awards

Ongoing	**Semifinalist**, Formosa Speech Grand Challenge - Talk to AI
2018	**Outstanding Performance Award**, National Taiwan University
2018	**3rd Place**, Problem A at ICCAD CAD contest
2018	**Top 10**, Problem B at ICCAD CAD contest
2018	**Appier Scholarship**, Travel grant for ICCAD 2018
2018	**3rd Place (first pure-undergraduate team in top 3 in 14 years)**, ISPD Contest
2017	**Research Project Grant**, Taiwan Ministry of Science and Technology
2017	**Top 12**, Formosa Speech Grand Challenge - Talk to AI (Warm-Up Match)
2017	**National Technology and Science Scholarship**, CTCI
16,17	**3rd Place (2 times)**, NTU ACM ICPC Ranking
2017	**3rd Place**, National Collegiate Programming Contest
2017	**3rd Place**, ACM ICPC Regional Contest
2016	**2st Place**, ACM ICPC Regional Contest
2016	**1st Place**, Calculus World Cup
2016	**6th Place**, Data Structure and Programming Final Project Contest
2016	**2nd Place**, Newcomers for ACM-ICPC Taiwan Online Programming Contest
2012	**Silver Medal**, International Geography Olympiad

Extracurricular Activity

***Director*, Academic Department of NTUEE Student Association**   *09/2016 - 06/2017*
- Led a team of over 30 students to provide academic services to the 700+ undergraduates, including, but not limited to the followings.
- EExplore: an event where professors introduce every research area in EE department to freshman.
- Lab Intro: a week of continuous lab introduction by the corresponding professor to recruit interested undergraduate researchers.
- Others: online course selection, online textbook bookstore, makerspace, etc.

***Chair*, MakeNTU Makeathon**, [website], [FB fansite], [Recap video]   *08/2016 - 02/2017*
- Co-organized the largest nationwide student makaethon in Taiwan with 200 participants, 70k USD arrangement, and 60 volunteers.
- Collaborated with the Taipei City and 22 international companies, including Google, Microsoft, Dell, TSMC, Intel, ARM, Asus, etc.

***Interviewer*, NTUEE+**, [Video]   *08/2017 - 09/2017*
- To promote the NTUEE social network around the globe, I interviewed Dr. Hsiao-Wuen Hon, a NTUEE alumnus, who received Ph.D. in CS from CMU and is currently the corporate vice president of Microsoft.

Skills

Natural Languages	Chinese (native), English (TOEFL 109, GRE 326/3.5)
Programming Languages	Python, C/C++, Shell, Javascript, Matlab, LaTeX
Deep Learning Libraries	Tensorflow, PyTorch, Keras
